PURPOSE

Primary trainer for both new and existing clinical services staff and clinicians. Areas of training include clinical skills to support clinicians and using the EMR in partnership with the Nurse Managers, HR, and the IT Applications team. Organizes, develops and conducts company training programs for clinical staff. Maintains training records and assess the effectiveness of training programs while staying up to date with changes in policies, procedures, and technologies that impact the training program.

ESSENTIAL JOB DUTIES

ESSENTIAL JOB DUTIES

- Develops and conducts training programs and methods for clinical staff and clinicians, and EMR functionality at all locations within WHA.
- Performs the duties of an MA or LPN as outlined in the relevant job description as needed for interim coverage with the intent to maintain clinical skills and perform side-by-side training with clinical staff.
- Coordinates and/or conducts training sessions covering specified areas such as EMR training, on-the-job training, refresher training, etc.
- Helps complete and review Clinical Services Training checklist and follows up with supervisors regarding 2 and 6 month performance evaluations.
- Confers with management, supervisors, IT and HR departments to gain knowledge of work situations requiring training and to better understand changes in policies, procedures, technologies and business initiatives. Assists with rollouts, training and communication associated with changes in EMR or workflows.

- Coordinates training and onboarding schedules with the hiring and training demands of WHA in partnership with HR, site leadership, and call schedulers. Partners with other Trainings Specialist to plan and facilitate new employee orientation.
- Assists in development of content for new training programs; reviews, evaluates, and modifies existing and proposed workflows and training materials; recommends appropriate changes.
- Utilize training outline and determine instructional methods, including group instruction, individual training, demonstrations, meetings and workshops for clinical staff.
- Utilize teaching aids such as training handbooks/manuals, handouts, demonstration models, multi-media visual aids, tutorials and evaluations for the clinical staff. Maintains training materials used with most up to date information, including Epic upgrade rollouts.
- May test employees to measure progress and evaluate effectiveness of training.
- May conduct needs assessment and workflow evaluation for development of training curriculum.
- Monitors trainees progress, offers guidance and makes corrections as needed. Reports on progress of employees during training periods and annual competency reviews.
- Assists employees with problems on how to perform specific tasks related to their position. Makes suggestions on improving work procedures.
- Support Preceptor team as needed to ensure they are effective in their clinic roles. Facilitates new Preceptor training and quarterly check in meetings.
- Manages Litmos program; assigns and verifies employees complete required content in timely manner and designates employees to their team at WHA.
- Partners with clinical leadership to assist with clinical competencies.
- Collaborates with Legacy training team regarding environment build creation in training environments. Communicates and reviews upgrade material prior to rollout dates.

SECONDARY JOB DUTIES

- May assist with planning and implementing training for more specialized clinical positions, such as sonographers.
- Attends WHA, department, office and clinic meetings as needed to collect and/or provide additional insight and updates per policies and programs.
- Participates on committees and special projects.

Duties note

- Performs other related duties, as assigned.
