Workflows/Tools - Links

Utilize the following helpful document links (SharePoint) for help with scheduling, routing and general USS & WHA workflows

Ultrasound Scheduling at WHA
US Scheduling manual for USS/PS with detailed staff workflows

Patient Ultrasound Scheduling Summary
A detailed walkthrough on how and when to create a Patient Summary in Epic

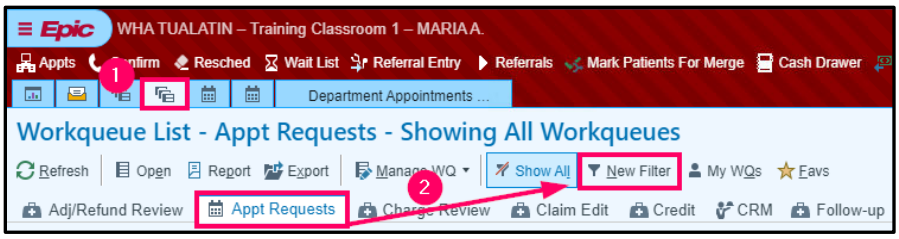

WHA & NWP Standard US Scheduling Guide
Used to determine what visit types/lengths to schedule in Epic based on ordered US requests @ both WHA & NWP

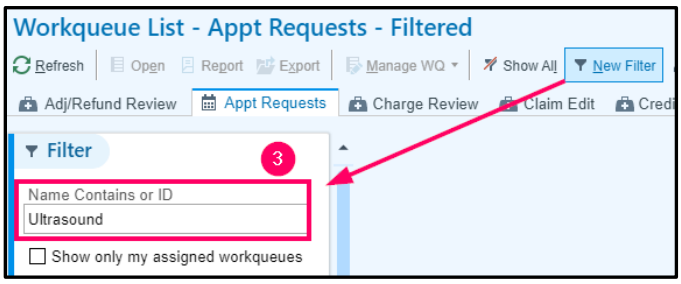

Ultrasound Scheduling Flexibility
Guidelines around US order priority levels and supporting scheduling workflows

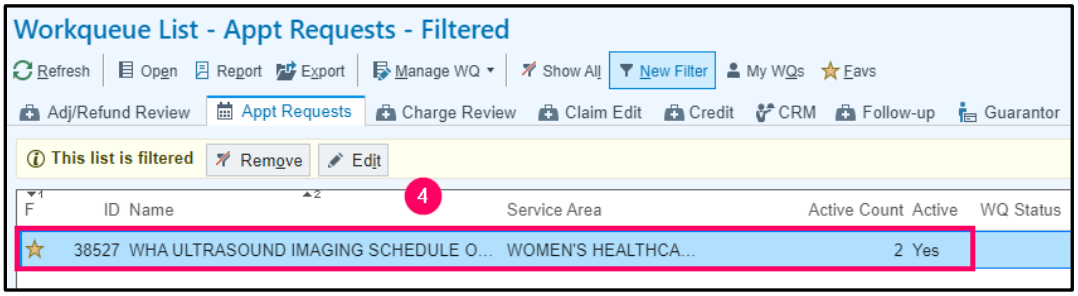

WHA PSR/POD LIST
This list will help determine which Pod to route Staff Messages, etc. to when needed

WHA Ultrasound Imaging Schedule Orders WKQ

This Workqueue needs to be worked every day to ensure any OB US scheduling needs are being addressed quickly, to make certain that orders are getting attached to already scheduled scans and to provide quality timely care to our patients

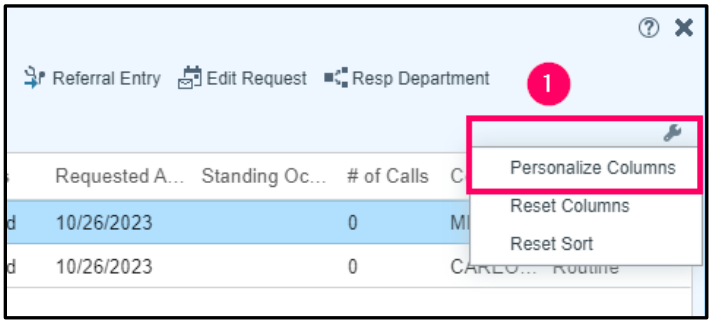

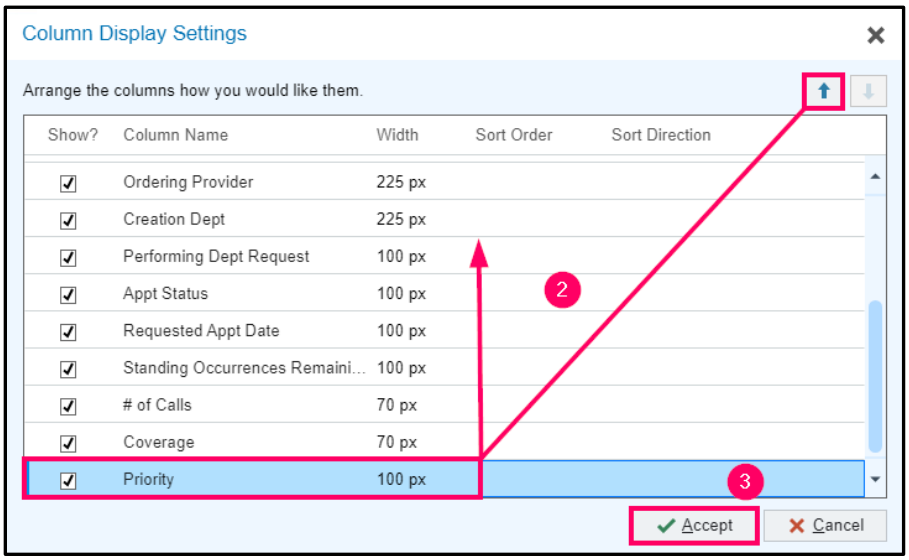

1. Select the **Workqueue list tab** from the Workspace Tabs
2. Click the **Appointment Requests** tab then select **New Filter**
3. Add "***Ultrasound***" to the Name Contains field then click **Apply** at the bottom of the screen
4. The **WHA Ultrasound Imaging Schedule Orders WKQ** will now only display in your view. Click the star icon to save as a favorite under the Favs tab
   - Double-click the WKQ to open

Personalize Display Settings

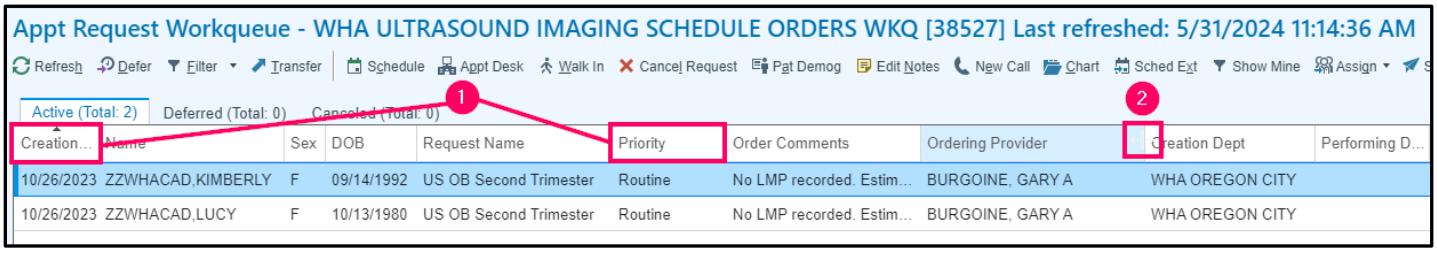

1. To sort column order in your view, select the **wrench icon** at the top right then **Personalize Columns**
2. Drag and drop or use the arrow icons to move column titles in any order vs the default

   Example: *Move the Priority column closer to the top of your list for easier viewing*
3. Click **Accept** to save the settings

Ascending Columns/Organization

1. Click on the column title to ascend your columns based on the content order. **Example:** *Clicking the Creation Date title once will ascend from oldest to newest dates. Priority will group the listed priorities (ASAP, STAT, Routine, etc.)*
2. Hover over the middle of column titles and click to drag the columns left or right to change the size of the field, as needed

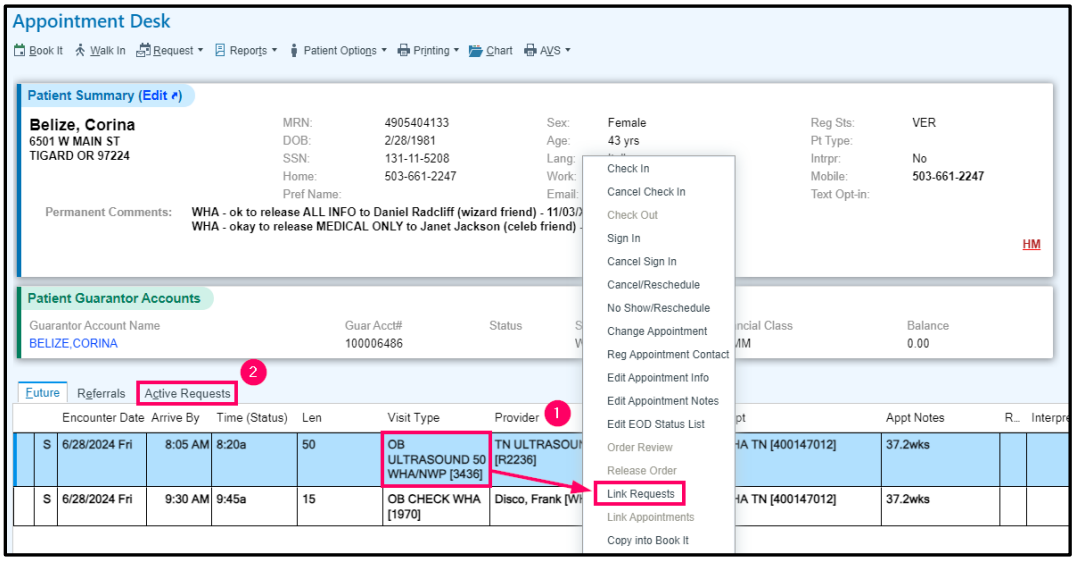

Workqueue Tasks

Urgent Orders

Any urgent US Orders should have a STAT or ASAP priority listed. There will sometimes also be urgent orders for 1st Trimester Ultrasounds, like early Dating & Viability needs.

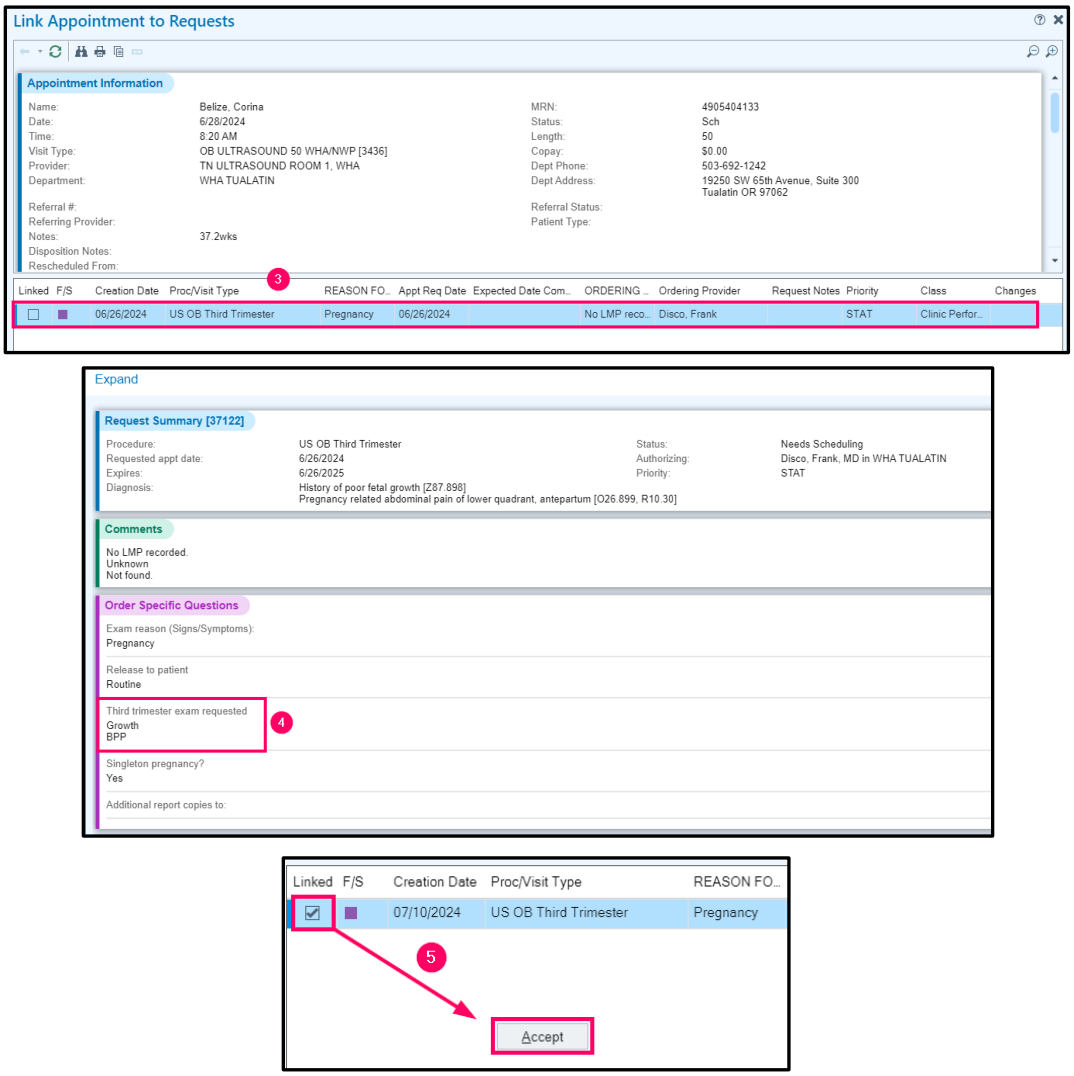

Ascend the WQ columns by clicking the Priority column title. *The Priority column will ascend in alphabetical order*

Check if the visit is already scheduled:

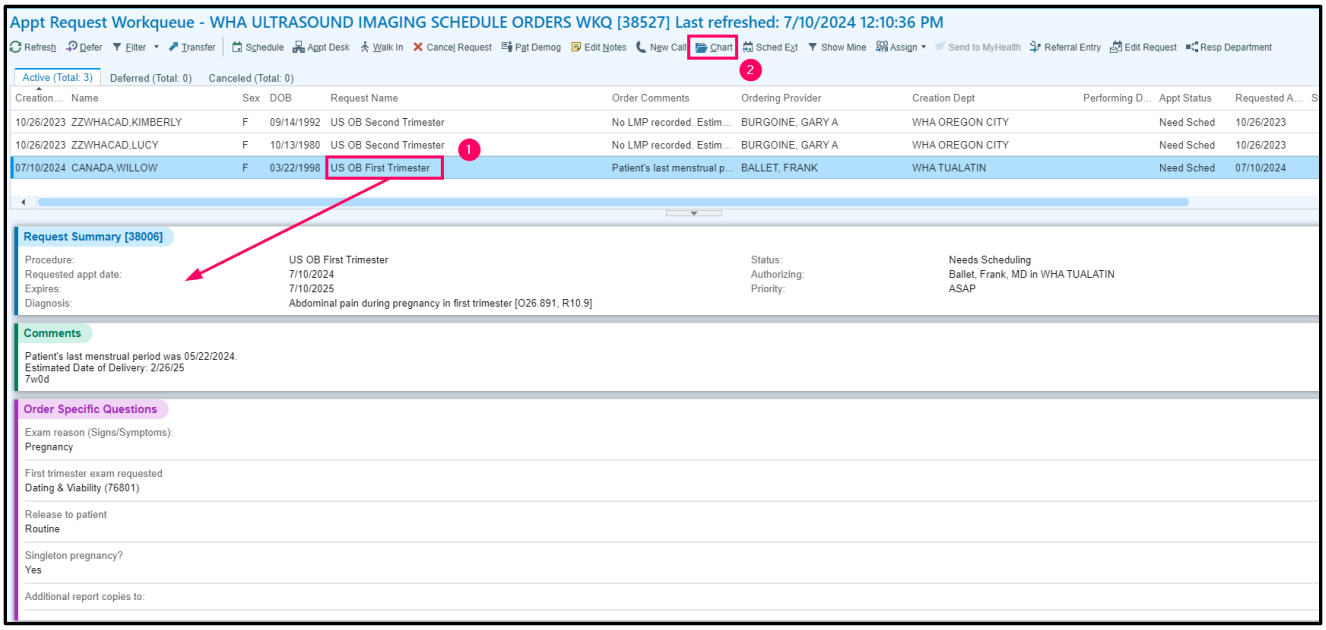

1. Go to the patients Appt Desk and check the Future tab for any scheduled US visits. If you find the correct one that matches the order, right-click on the US appt then select **Link Requests** from the dropdown
2. You can also see if there are any orders listed under the Active Requests tab

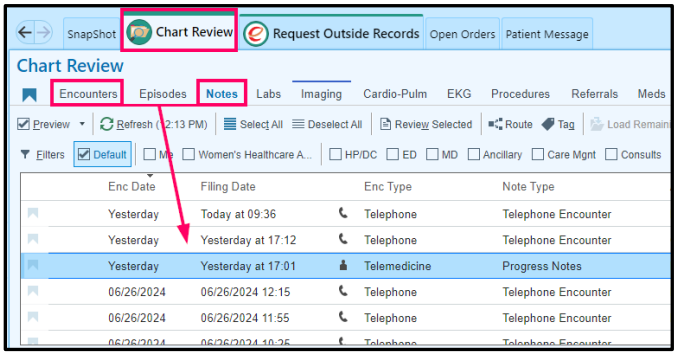

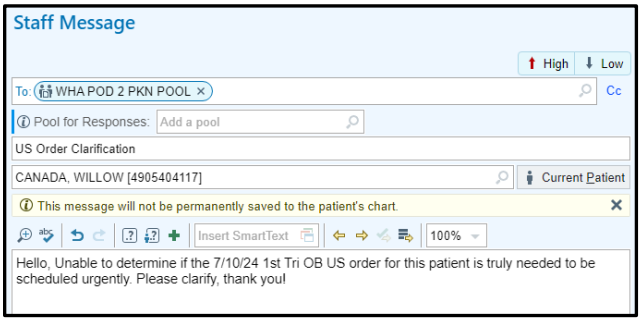

3. Find the US order and **double-click** to expand the details
4. Under the **Order Specific Questions** section, you should find all the details including which kind of US is being requested to make sure you are linking the correct order

   Note: If there are multiple US orders listed, make sure to expand each to ensure you are choosing the correct one
5. To link the order, select the **checkbox** under the Linked column then click **Accept** at the bottom right of the window

Urgent 1st Trimester US Orders

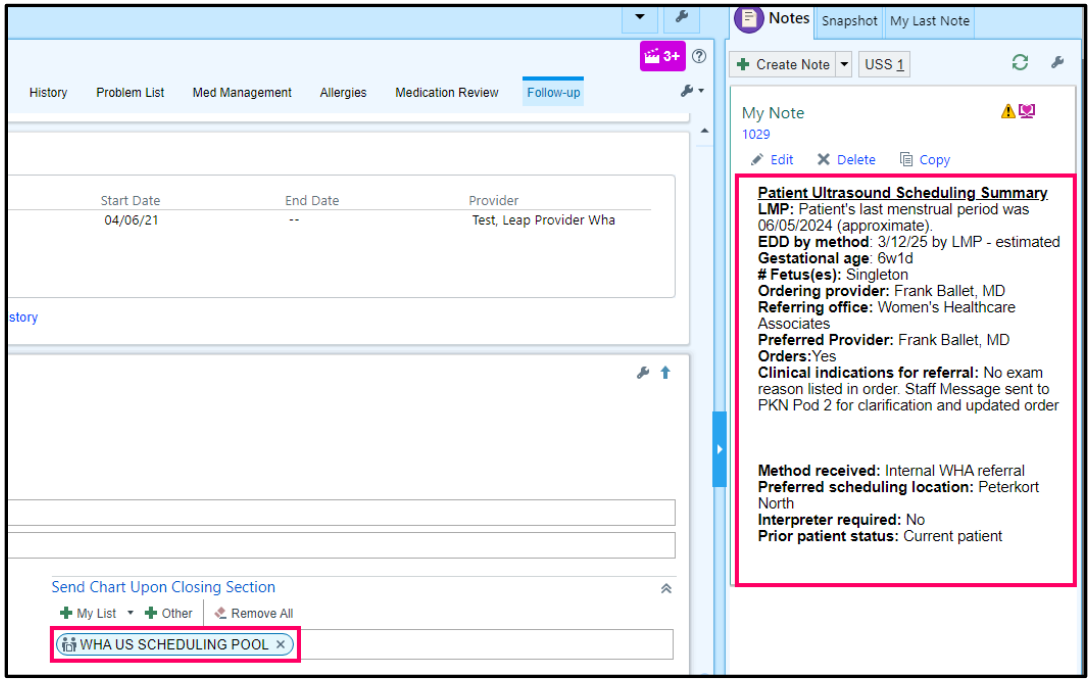

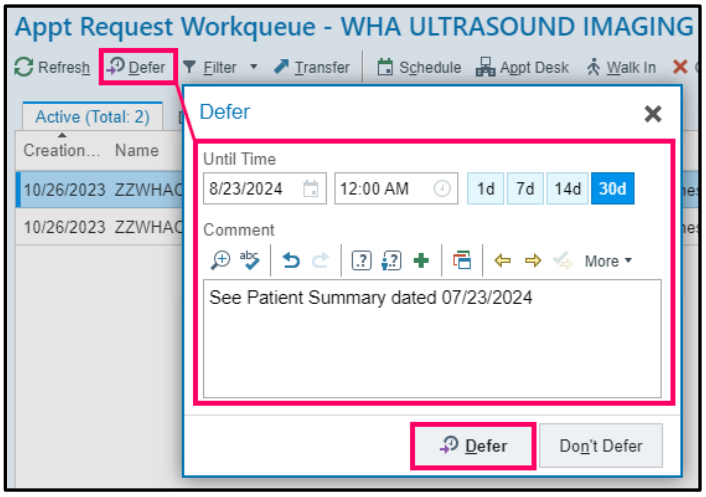

1st Tri US Orders will need to be looked at to determine if it is truly an urgent order

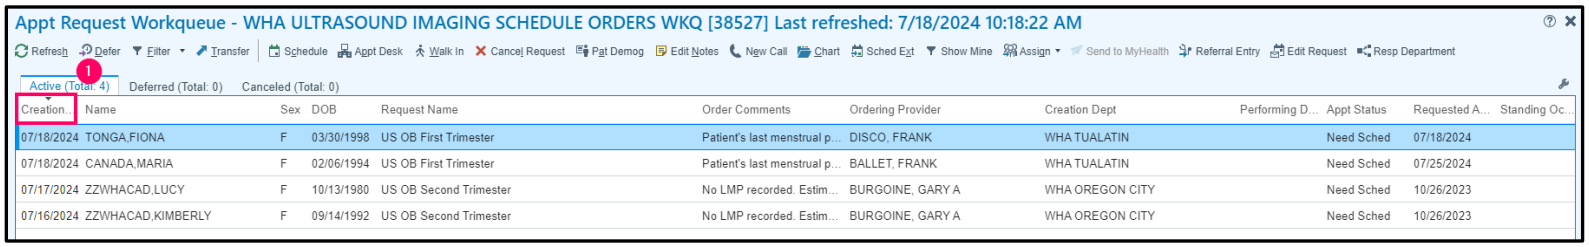

1. Select the order from the WKQ to expand the details
2. Unable to determine if the order is urgent? Click the **Chart** icon to do some further investigating
    - Under **Chart Review**, find the most recent visit notes or any other documentation for further instructions, etc.
    - If you are still unable to determine urgency, send a **Staff Message** to the appropriate Pod Pool asking for clarification from the clinical staff/clinician

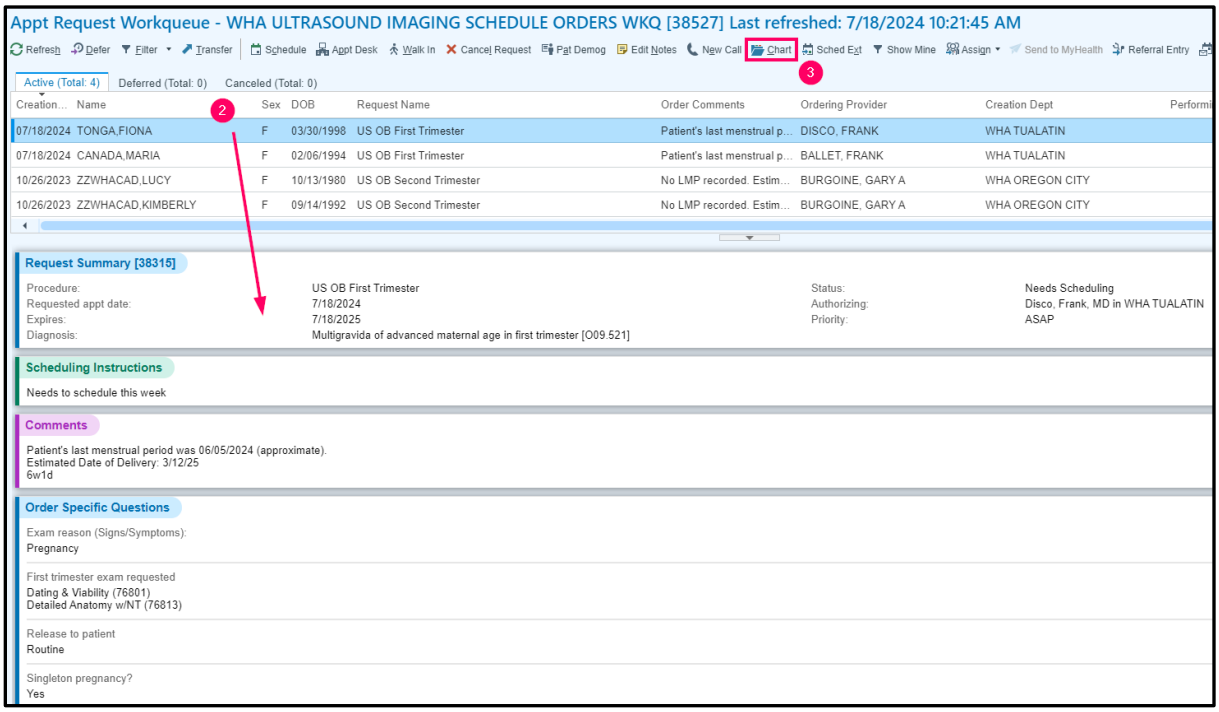

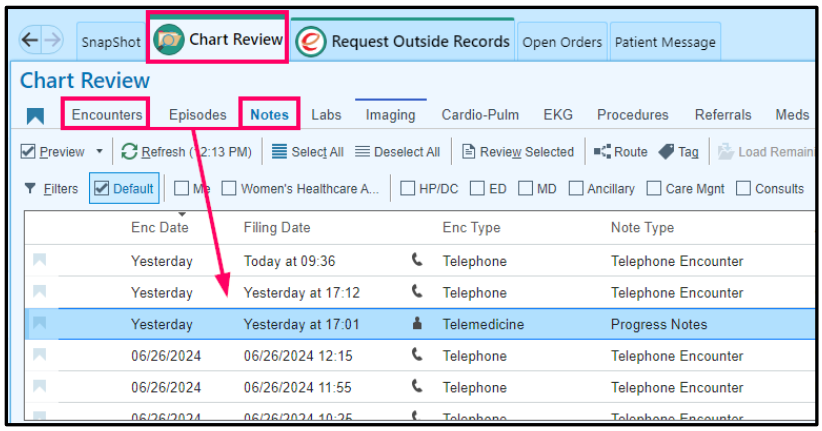

- Create a Patient Summary that includes documentation re: routing a Staff Message to the Pod. Send to the WHA US Scheduling Pool for tracking
- **From the WKQ** – Highlight the order then select **Defer**. Choose the **30d** button, add a Comment ("*See Patient Summary dated xx/xx/xxx*") then click **Defer**

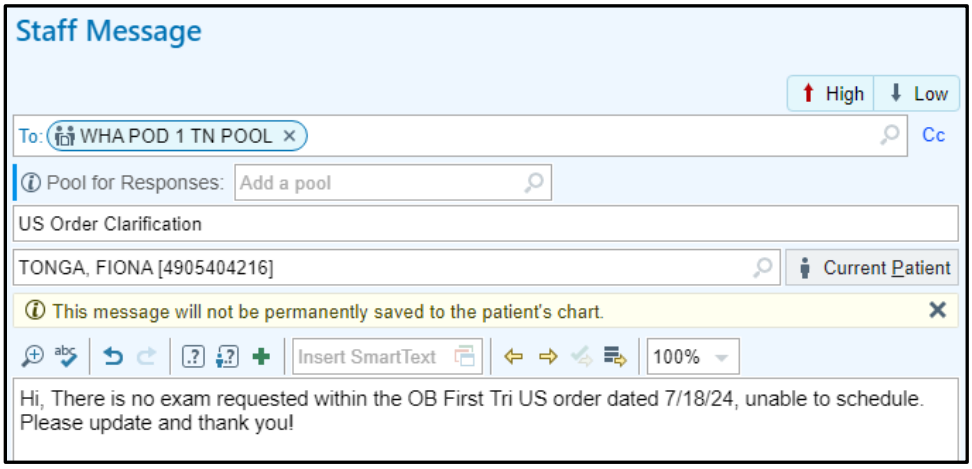

New Orders

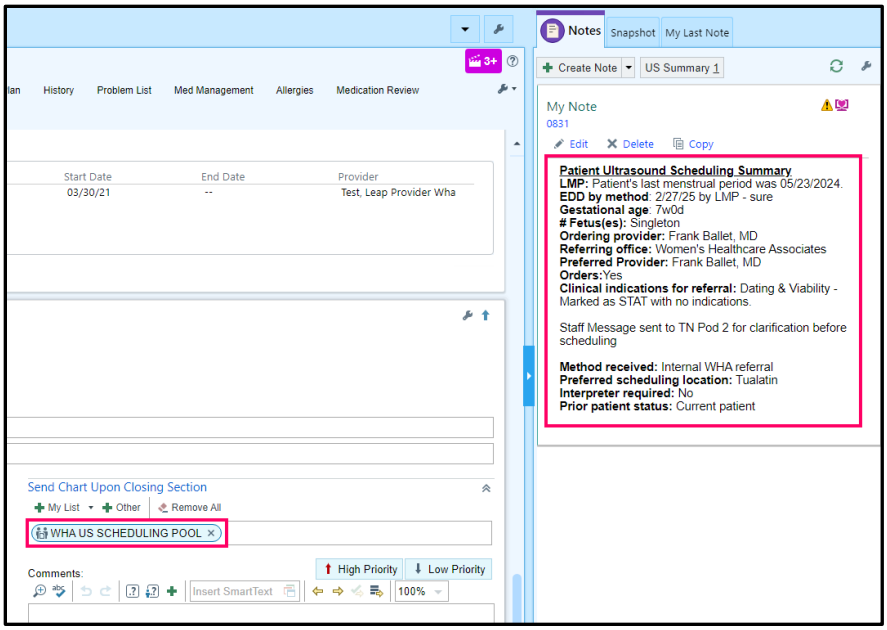

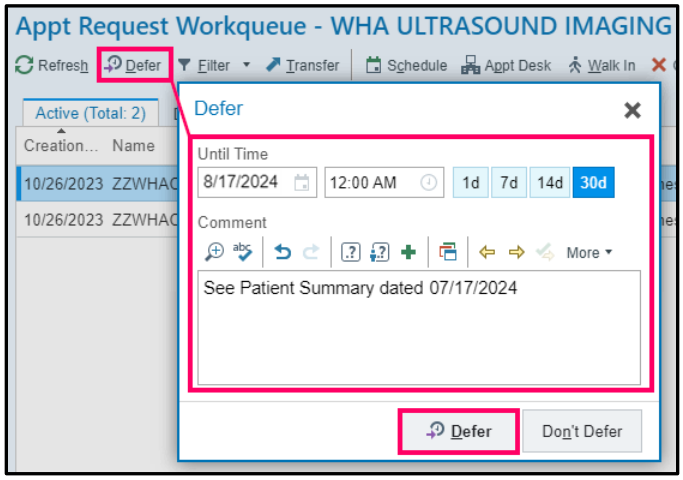

1. Sort the **Creation Date** column to show the soonest dates at the top
2. Select the order to **expand** the information to determine scheduling needs
3. If unable to determine what needs to be scheduled or for any other clarification, select **Chart** to do some further investigating

- Under **Chart Review**, find the most recent visit notes or any other documentation for further instructions, etc.
- If you are still unable to determine what US is being requested from the chart, send a **Staff Message** to the appropriate Pod Pool asking for clarification from the clinical staff/clinician

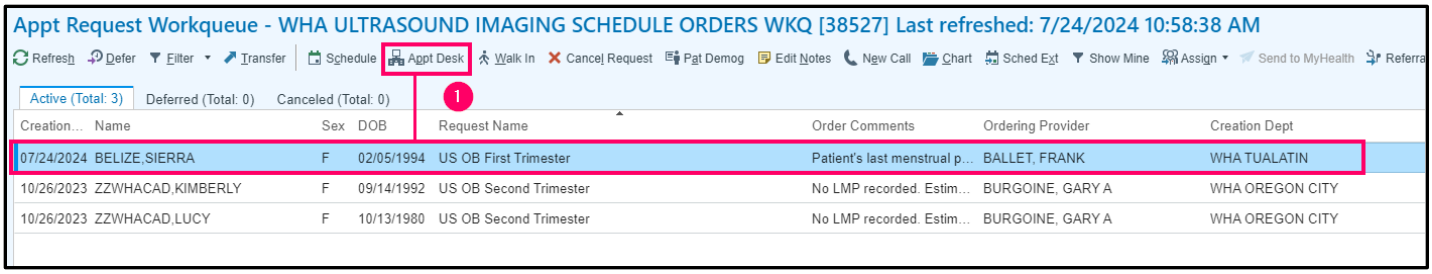

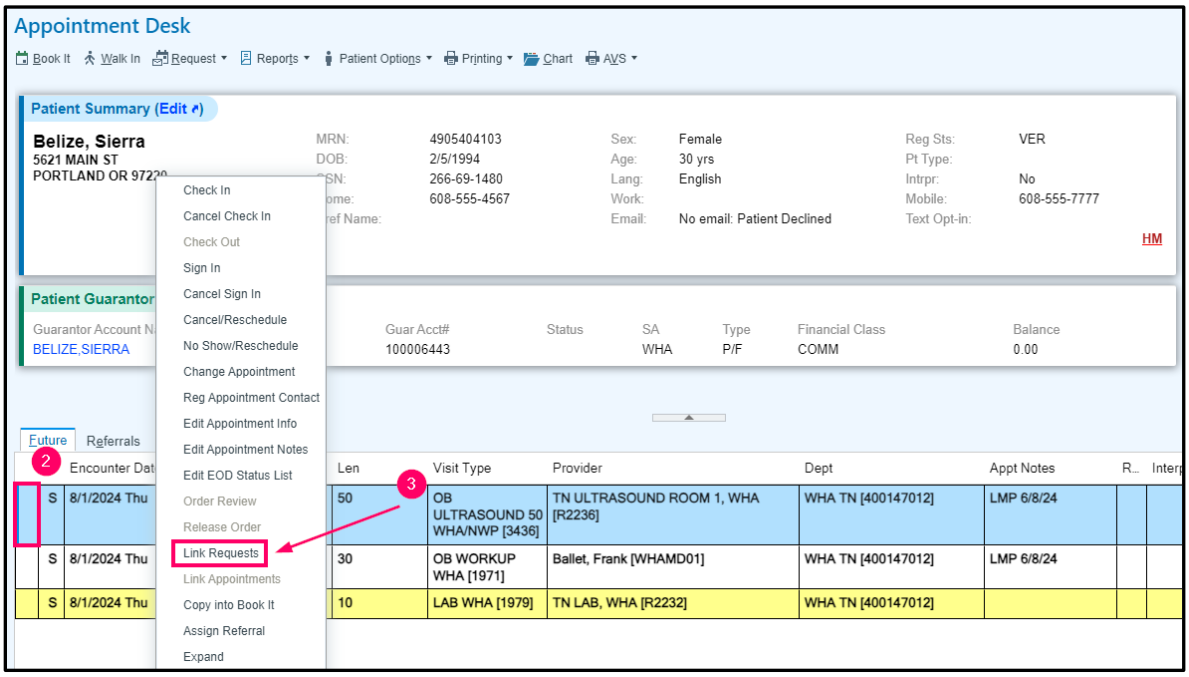

- Create a **Patient Summary** that includes documentation about routing a Staff Message to the Pod. Send to the WHA US Scheduling Pool for tracking
- **From the WKQ** – Highlight the order then select **Defer**. Choose the **30d** button, add a Comment ("*See Patient Summary dated xx/xx/xxx*") then click **Defer**

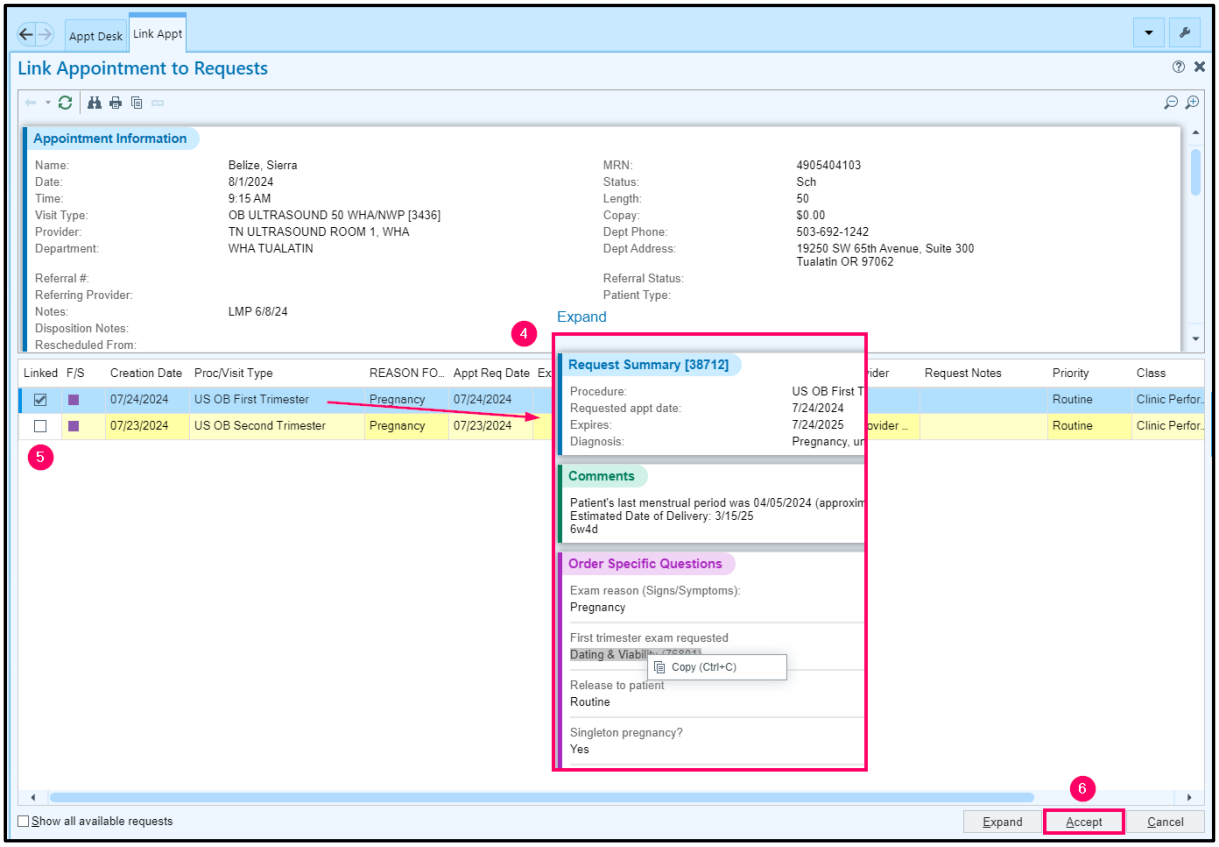

Linking Orders to Scheduled Ultrasounds

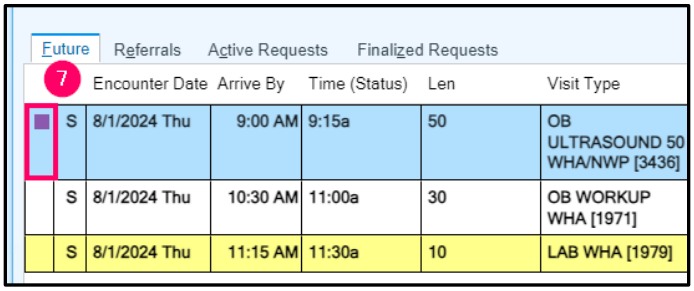

Sometimes there will already be an Ultrasound and subsequent visits scheduled prior to the order being placed (*More often the 12-13.6wk visit*). This will require you to link the appropriate order request to the scheduled visit

1. Find the order in the WKQ then select the **Appt Desk** activity
2. Look for scheduled US visits under the Future tab and to see if there are any orders already linked (**purple square** icon)
3. If there are no orders already attached, **right-click** on the US visit and choose **Link Requests** from the pop-up menu

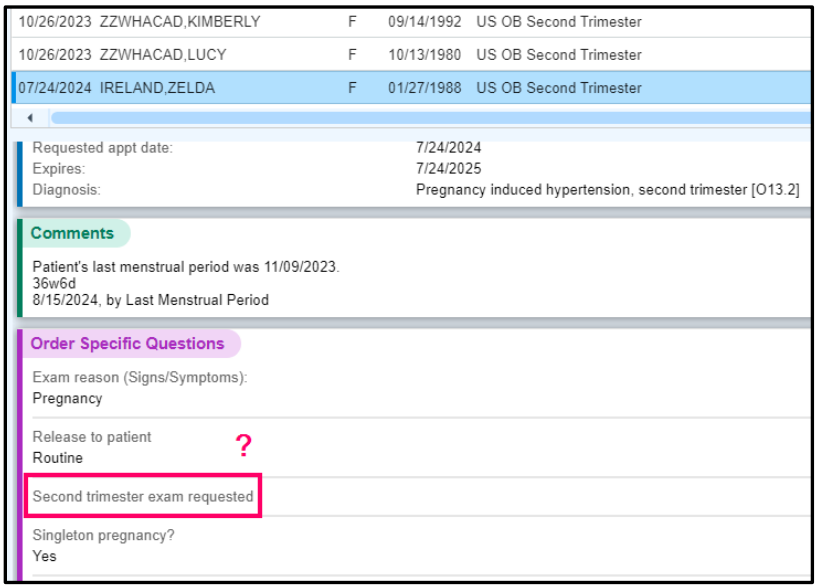

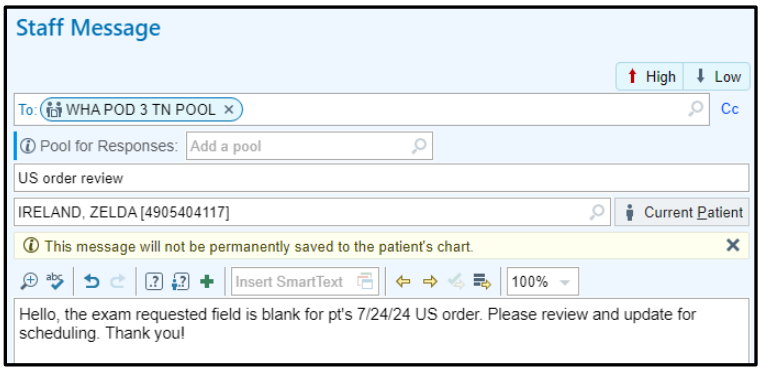

4. Make sure the correct order is being selected by **double-clicking** to expand. Copy the exam requested section to add to the visit notes (*Make sure to only copy the name of the exam and leave out the subsequent numbers*)
5. Under the **Linked** column, checkmark the order to be attached
6. Click **Accept** to save once you have the order checked
7. The order is now visibly linked on the Appt Desk

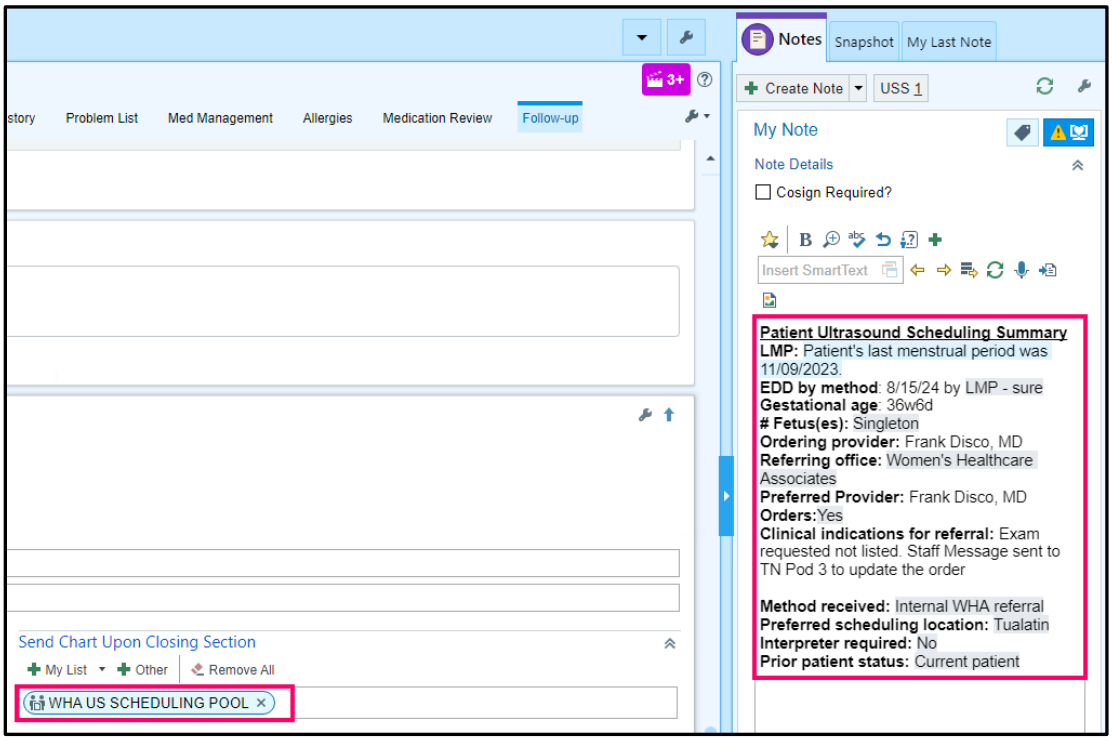

Order Discrepancies

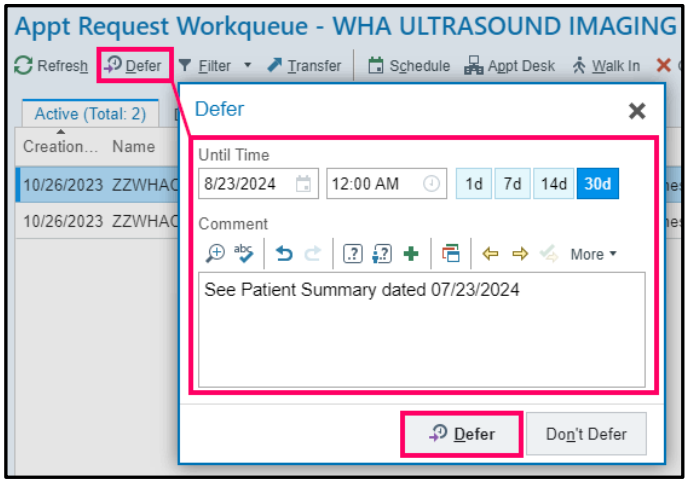

There are a variety of discrepancies with orders that could occur such as: No exam requested listed/ Duplicate orders/ Expiration date set for too soon/ No indication of twins, etc. These orders will typically need to be fixed by the clinical team/clinicians before scheduling

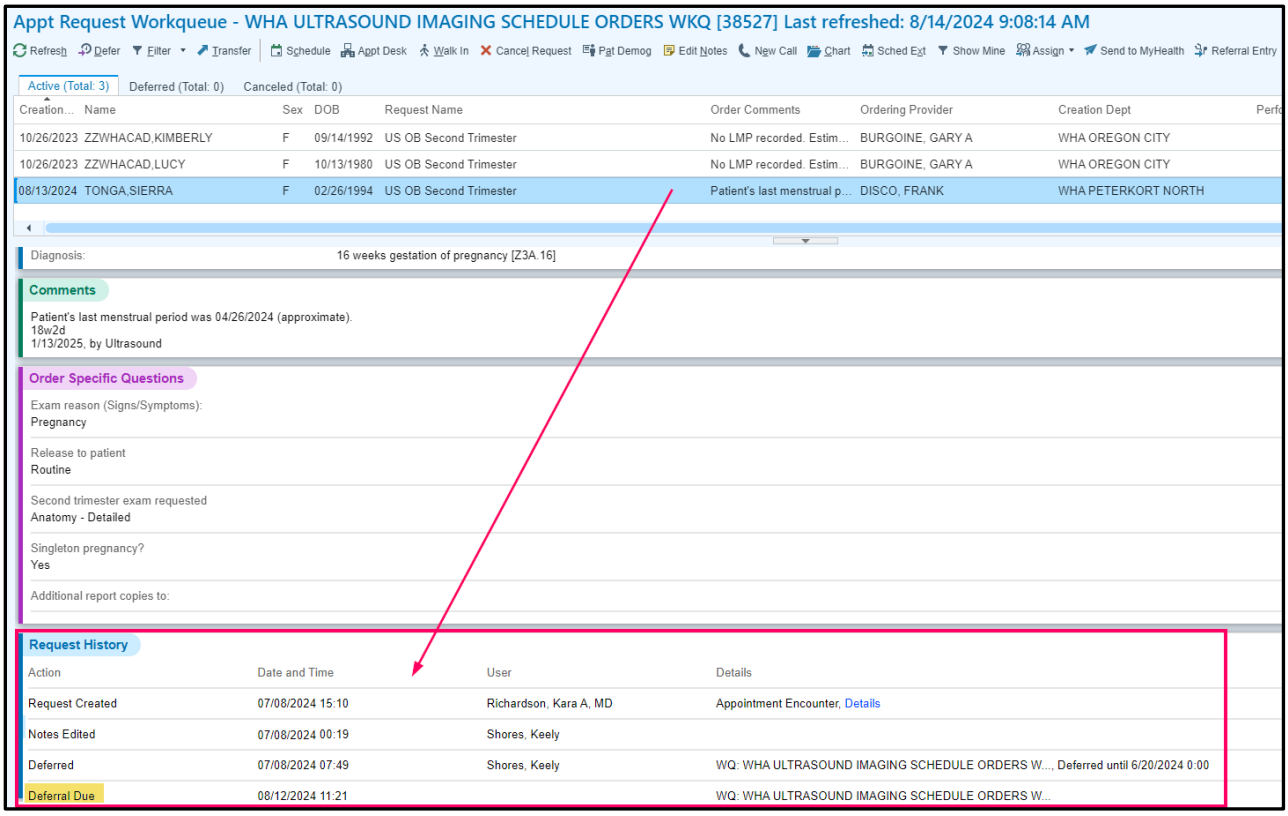

- Expand the order from the WKQ. If you are missing any info that aids in scheduling the visit, you will need to reach out to the Pod to have the order updated/fixed before moving forward
- Send a **Staff Message** to the appropriate Pod Pool asking to update/fix the order

- Create a **Patient Summary** that includes documentation about routing a Staff Message to the Pod. Send to the WHA US Scheduling Pool for tracking
- **From the WKQ** – Highlight the order then select **Defer**. Choose the **30d** button, add a Comment ("*See Patient Summary dated xx/xx/xxx*") then click **Defer**

Deferred Orders

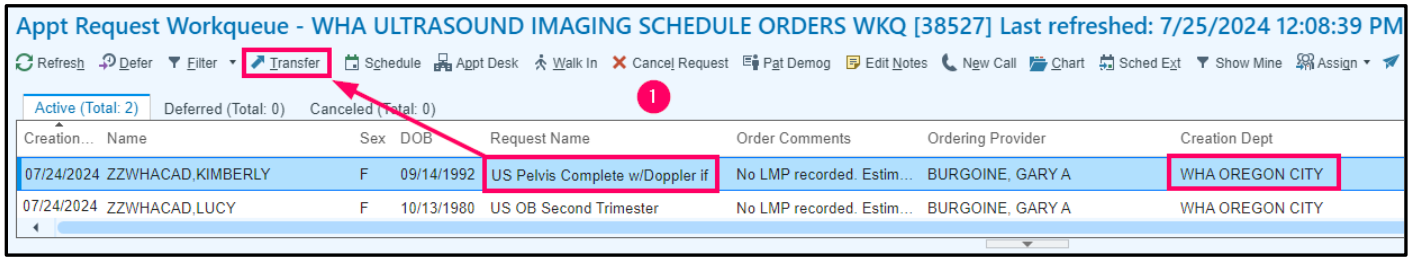

When a previously deferred order falls back to the main US Imaging Orders WKQ (*usually 30 days from the deferred date*), you will need to determine the following:

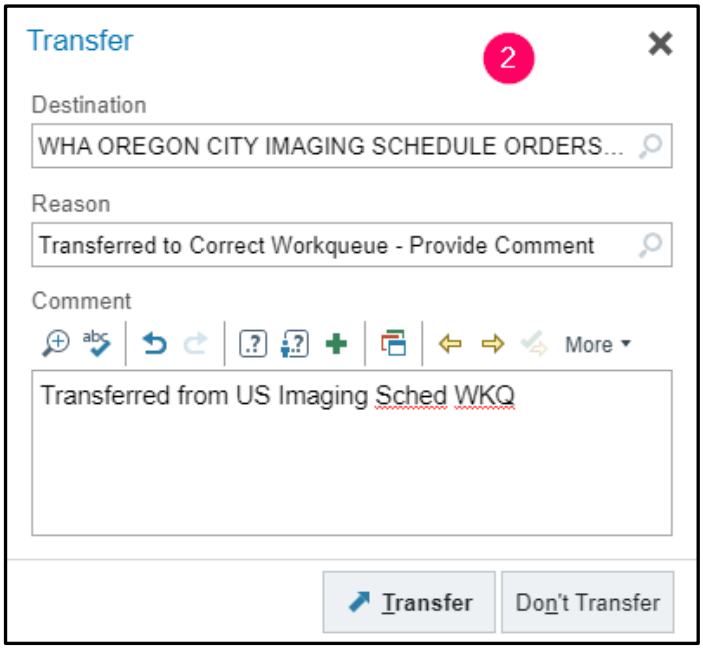

- Is the patient scheduled? If so, does the order need to be linked?
- Did the visit get cancelled for any reason?
- Is the order still needed per provider?
- Are we still waiting for further clarification/instruction to help guide scheduling?
- Did the patient transfer care?
- Is the order a duplicate?

GYN Pelvic and NWP Orders

The USS Team currently only manages OB Ultrasound scheduling for WHA.

If you happen to find any GYN or NWP specific US orders under the US Orders WKQ, you will want to transfer them to the appropriate WHA clinic's imaging WKQ

1. Find the order request needing to be transferred (*Expand for more details*). Check the **Creation Dept** location indicating where to transfer. Select the **Transfer** activity

   NWP orders, send to: *NWP East and West Imaging Schedule Orders WKQ*

2. Add the following
   - **Destination:** Add the site-specific Imaging Schedule Orders WKQ
   - **Reason:** Transferred to Correct Workqueue
   - **Comment:** Indicate the order is being transferred from the US Sched WKQ
   - Click **Transfer.** The order will then be removed from the US WKQ list

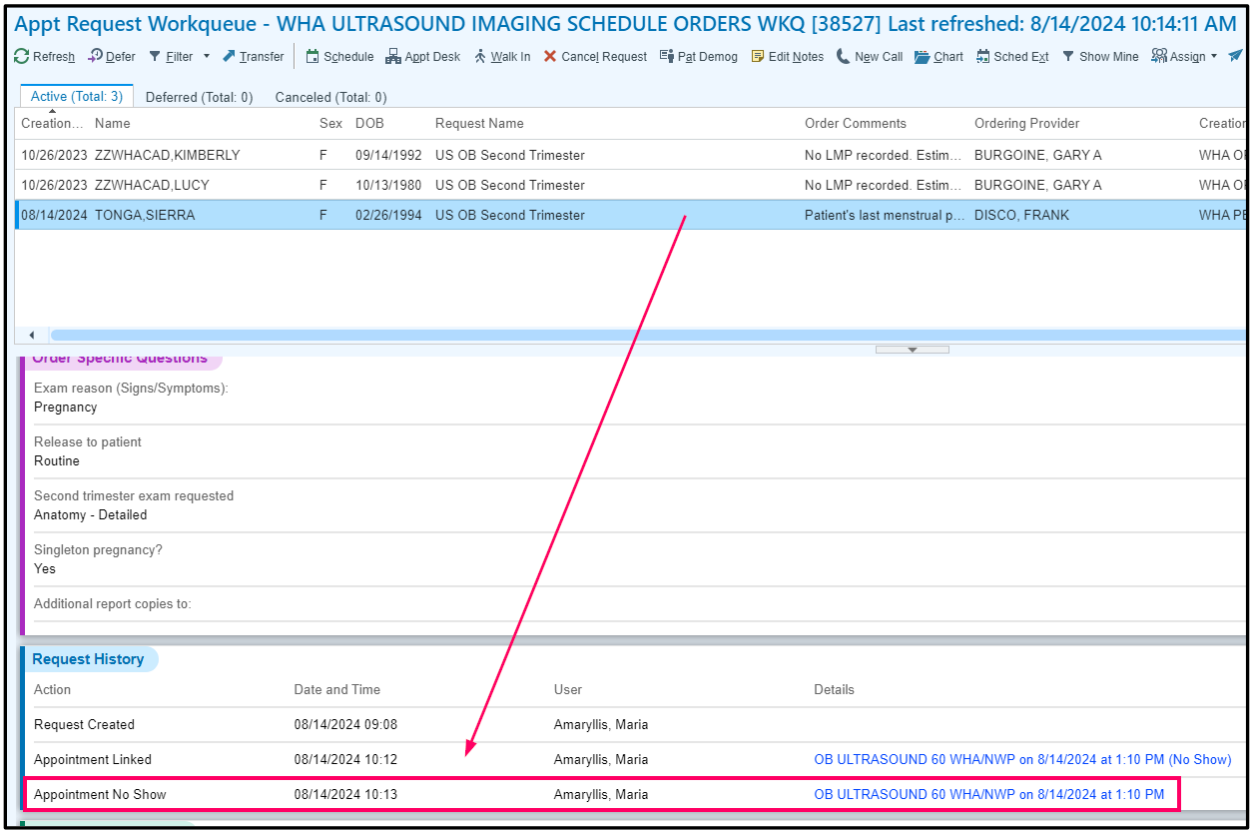

No Shows/Cancelled visits/MyHealth Cancellations

When US visits with linked orders are no showed or cancelled, the order will fall back to the Active WKQ tab. Details for the cancellation will appear under the Request History section of the order.

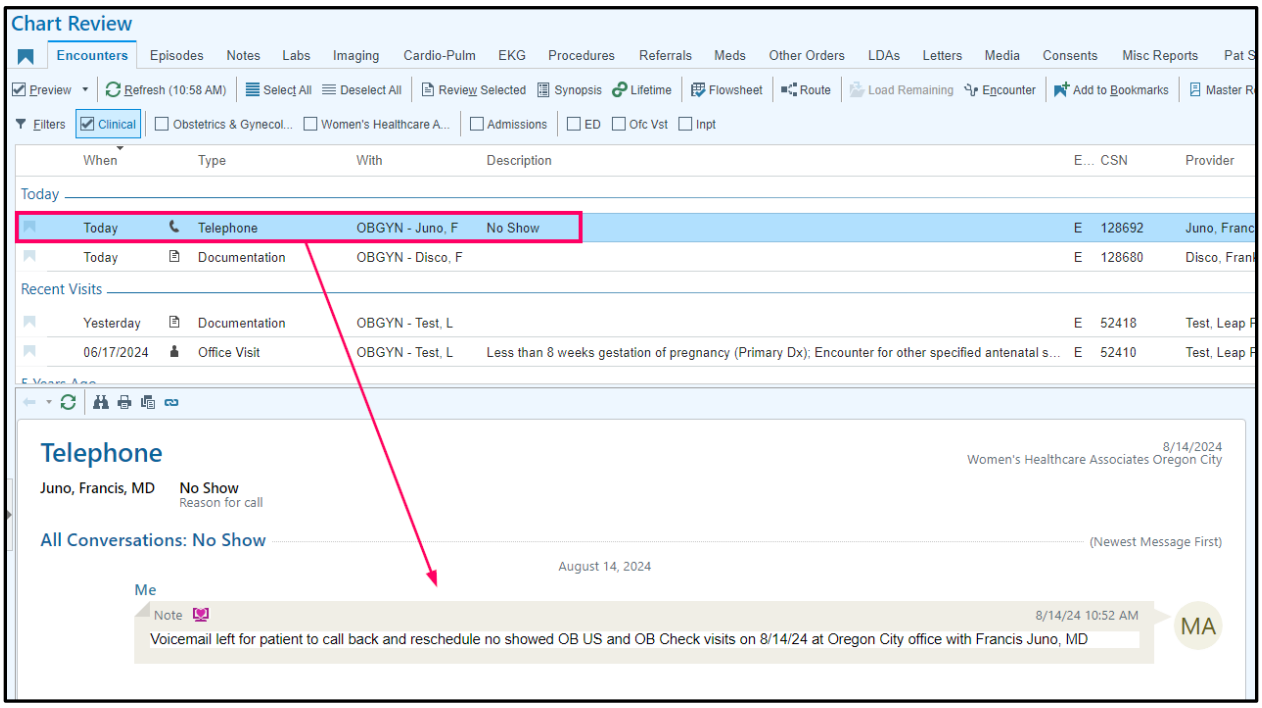

Confirm the following:

- Was the patient contacted to reschedule?
- Does the patient want or need to reschedule?
- Is the visit/order still needed?

No Show Example:

- From the WKQ, look under the **Request History** section of the order to find details of the cancellation. This is an example of a **No Showed** US visit

The No Show workflow indicates that staff will start a Telephone Encounter and also send a No Show letter if they are unable to reach the patient via phone to reschedule

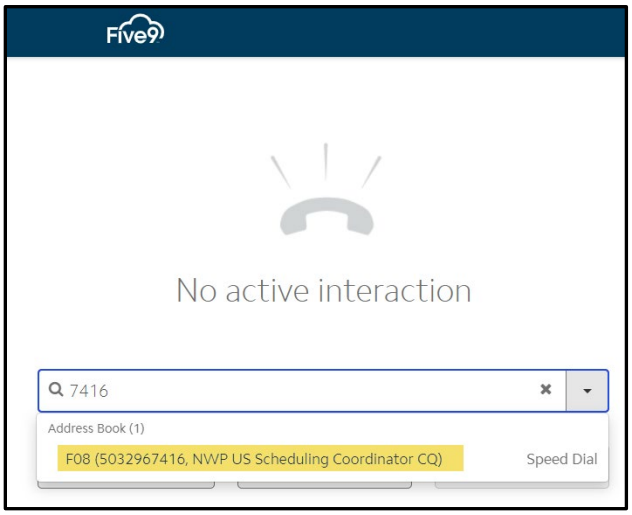

- A Telephone Encounter with a No Show description will be visible from the Chart, click to expand for more details
- Any letters sent to the patient will be visible under the Letters tab of the Chart
- Document any USS contact made to the patient within the No Show Telephone Encounter
- If no obvious contact was made to the patient, start a **Patient Summary** for follow up and documentation

Ultrasound Coordinators

The USC Team is available to help. Reach out to them for the following:

- Asking for more details of what the order should be so that you will know what to ask for regarding changes/review by provider, etc.
- Anytime you are unsure about an order
- Helping find spots on the WHA US templates for urgent same day/next day scheduling needs

Call the *WHA NWP US Scheduling Coordinator CQ* line in **Five9**:

Ultrasound Coordinator Team:

- Dana Krebs
- Peyton Brown
